MACDC-RPM

27 MAR 1971

Major General Dong Van Khuyen
Deputy Chief of Staff for Logistics
Joint General Staff
Republic of Vietnam Armed Forces
Saigon, Vietnam

Dear General Khuyen:

Reference is made to the letter from General Vando Hoy to General Manh, dated 18 December 1970, concerning base transfer actions, and to General Manh's reply on 12 January 1971.

An evaluation of requirements indicates that the US Advisory Team Facility, San Keo SF Training Center, located at grid coordinate 30202450 in Tay Ninh Province, is excess to U.S. needs. The facilities, consisting of one building for 17 men and a small storage shed, are available for transfer to RVNAF provided they will accommodate a unit authorized in the Consolidated RVNAF Improvement and Modernization Program (CRIMP). Preliminary coordination indicates that Tay Ninh Sector is interested in this facility. Request you consider the availability of these facilities in light of RVNAF requirements and inform this headquarters (ATTN: MACDC-AM) of your desires and proposed use of the facilities.

In connection with base transfers, the spaces for facilities maintenance must come from those spaces authorized in the CRIMP, and no additional spaces will be authorized specifically for base security. In addition, transfer does not imply that Military Assistance Service Funded (MAST) Program funding will be provided for base or equipment support.

It is further requested that the appropriate individuals on your staff contact their counterparts on the MACV staff in order to continue combined negotiations concerning equipment requirements.

Sincerely,

R. P. Young
R. P. YOUNG
Major General, USA
Director of Construction
